**TCA Welcomes the Federal Governments tick for Burnie Paper Mill
produced carbon neutral ENVI paper.**

North West Hellyer branch members of Timber Communities Australia are extremely pleased that the locally produced carbon neutral ENVI printing papers have been approved for use by all members and offices of Federal Parliament.

“This approval for Burnie produced ENVI printing paper is great news for all TCA members and we thank the Federal member for Braddon Sid Sidebottom for his important role in gaining this important achievement”, Christine O’Connor president of the Hellyer branch Timber Communities Australia said today .

“This latest approval builds upon the earlier successful efforts of gaining approval for Tasmanian produced carbon natural ENVI printing paper as a preferred purchase for federal members of parliament electorate offices. TCA also acknowledges the valuable role local Senator Richard Colbeck played in gaining this earlier approval”.

ENVI paper is ideal as coated paper for use in publications such as brochures, reports and catalogues. It also carries a very important tick of approval being the “Green House Friendly” logo authorized by the department of Climate Change.

TCA also supports the forest Industries own health fund, Health Care Insurance challenge to all companies to specify Burnie produced carbon neutral ENVI paper for all printing tasks.

TCA encourages all users of printing paper to follow the lead set by our North West elected representatives and Health Care Insurance by always seeking to purchase Tasmanian produced ENVI printing paper.

Today’s announcement by the Federal member for Braddon reinforces the fact that ENVI is a quality paper, it supports Tasmanian jobs right through the industry and it is the most environmentally friendly paper available on the market. Mrs. O’Connor concluded.
